

The RNR, RNS and RNFS Series

Three extensions of the RN Series theme.

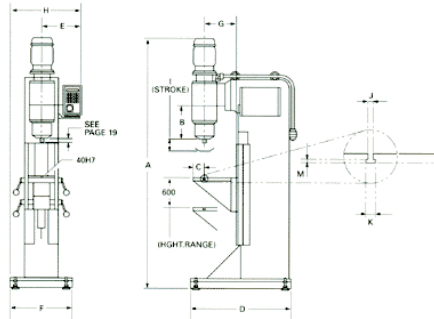

The RNR includes a built-in index table. The RNS is a pedestal style machine designed for riveting long parts. The RNFS takes the pedestal style a bit farther - with a deep frame and compact arm design for riveting large or awkward assemblies. The RNFS riveter is also available without a floor stand (referred to as the RNF Series) or arm (referred to as the RNY Series).

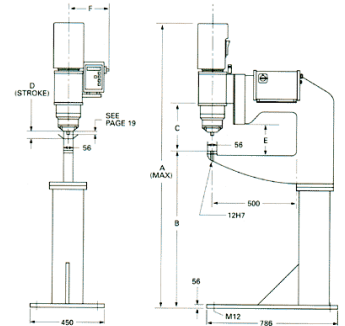

RNR Individual Dimensions

RNS Individual Dimensions
